

PHASE 2

Learn to identify aggressive buyers and sellers in real time, validate intent in footprint and finish with fully configured Prof Trading Environment

Section 1 Intro and what to Expect - ~~Foot~~ Footprint Chart Architecture & mechanics 3 videos

Section 2 - Tracking Aggressive & Passive Institutional Behavior. 3 videos

Section 3 - Trading validation & contextual integration 3 videos

Section 4 Workspace optimization & Execution Design. 3 videos

Section 1 - Footprint Chart Architecture

1. Mastering Bid/Ask, Delta and volume profile variations

2. Spotting Volume Clusters: Locate high vol nodes where institutional heavy buying/selling occurs.

3. Imbalance mechanics: Calculate & identify diagonal buying and selling imbalances automatically

Section 2 - Tracking Aggressive & Passive Institutional Behavior.

2.1. Identifying aggressive Market orders: Track real time delta spikes that signal urgent institutional entry.

Section 4 Workspace Optimization & Execution Design. 3 videos

Section 1 Footprint Chart Architecture

- 1. Mastering Bid/Ask, Delta and volume profile variations
- 2. Spotting Volume Clusters: Locate high vol nodes where institutional heavy buying/selling occurs.
- 3. Imbalance mechanics: Calculate & identify diagonal buying and selling imbalances automatically

Section 2 Tracking Aggressive & Passive Institutional Behavior

- 2.1. Identifying aggressive market orders: Track real time delta spikes that signal urgent institutional entry.
- 2.2. Spotting passive Absorption: Detect large large limit orders absorbing aggressive selling or buying at key levels.
- 2.3. Exhaustion vs Absorption: Differentiate between fading market momentum and institutional blockades

Section 3 Trade validation & Contextual Integration

- 3.1. Validate levels with footprint: Confirm key support or resistance lines using order flow confirmation.
- 3.2. DOM & footprint confluence: Cross reference footprint and structural shifts with real time liquidity changes on DOM
- 3.3. Failed breakout Execution: Identify trapped traders on the footprint to execute high probability reversal strategies

Section 4

Workspace optimization & Execution design

- 4.1. Building professional template: Design a high utility chart layout combining footprint, DOM and Time and sales
- 4.2. Filtering Market Noise: Configure custom volume thresholds to display only sized institutional sized transactions
- 4.3. Execution Blueprint: Establish strict rule-based checklist for trade entry and management.

PHASE 1

Section 1 Introduction & What to Expect
(3 videos)

~~Section 2~~

Section 2 Trading Data (An institutional perspective)
(2 videos)

Section 3) Trading Data (Going deeper)
(4 videos)

Section 4 Market observation like a professional
(3 videos)

Section 5 Depth of Market (full installation)
(8 videos)

PHASE 1 The End. (1 video).

✓ Get Access to All future updates

✓ Includes Free Customs DOM (worth 2500 usd)

PHASE 1 3

Introduction & What to Expect (Section 1)

Understand how the program is structured, what you will be learning and how each stage builds towards prof analysis

1.1 Welcome to the Accelerator Get ready to level up.

1.2 What to expect 0-100%

1.3 Accelerator timetable

Section 2 Trading Data: An institutional perspective.

Discover why prof. trading is treated as a business and why retail traders are operating with only part of the info.

Section 5

PHASE 1³ Introduction & What to Expect (Section 1)

Understand how the program is structured, what you will be learning and how each stage builds towards prof analysis

- 1.1 Welcome to the Accelerator & get ready to level up.
- 1.2 What to expect 0-100%
- 1.3 Accelerator timetable

Section 2 Trading Data: An institutional perspective.

Discover why prof. trading is treated as a business and why retail traders are operating with only part of the info

- 2.1 Professional trading as a business
- 2.2 Closing the information gap: Retail vs Institutional

Section 3 Trading Data: Going Deeper.

Go deeper into how financial markets operate and the information institutional traders are using to make decisions

- 3.1 The real world.
- 3.2 An actual trader's (Institutional Trader's journey)
- 3.3 The key trading components.

Section 4 Market observation (like a professional)

Move beyond looking at static charts in hindsight and begin observing real buying and selling activity as it happens

- 4.1 DOM observation Exercise (Practical 1)
- 4.2 Continued DOM Exercise video.
- 4.3, observing Institutional Data Together (Practical 2)

Section 5 Depth of Market (Full instructions)

Follow complete step by step process to install and configure your own CUDOM

- 5.1 Installation intro.
- 5.2 Platform Comparison.
- 5.3 DOM installation part 1
- 5.4 DOM installation part 2
- 5.5 DOM installation part 3
- 5.6 DOM installation part 3 contract check
- 5.7 DOM installation part 4
- 5.8 DOM installation part 5

PHASE 1 - The end.
